SUMMARY

AI Engineer Intern with hands-on experience in building production-grade AI-powered web applications using LLMs, web scraping, and full-stack technologies. Skilled in automation, scalable system design, and integrating AI solutions to improve business efficiency.

EXPERIENCE

AI Engineer Intern — Talakunchi Networks Pvt Ltd Oct 2025 - Present

RFP Automation & AI Bid Management Platform

- Developed a production-ready web application automating RFP discovery and bid management, reducing manual effort by **70%**.
- Built a Selenium-based web scraping system to collect and process RFP data from multiple portals.
- Integrated MongoDB for persistent storage and real-time bid tracking.
- Implemented **LLM-powered summarization** and proposal generation, improving efficiency and bid quality.
- Designed reporting features including PDF previews, CSV exports, and Microsoft Teams integration.
- Developed a **scalable full-stack system** using Python (Flask), React 18, REST APIs, Tailwind CSS, and Docker.

TrackerPro – AI-Powered Project & Operations Management Platform

- Conceptualizing and designing an enterprise-level project and operations management platform to streamline the complete project lifecycle from client onboarding to execution and delivery.
- Conducting requirement analysis and workflow mapping across key stakeholders to understand operational processes, task dependencies, resource allocation, approval workflows, and project tracking requirements.
- Researching AI-driven capabilities including project health analysis, delay prediction, workload monitoring, risk assessment, and intelligent recommendations to enhance project visibility, operational efficiency, and decision-making. Currently in the research, business analysis, and system design phase.

TECHNICAL SKILLS

Programming	Python
AI/ML	Machine Learning, LLMs, Deep Learning, RAG
Frameworks	Flask, React 18, Selenium, REST APIs
Databases	MongoDB, SQL,LangChain
Tools	Docker, Git, Web Scraping, API Integration

PROJECTS

AI-Powered RFP Automation Platform
- Built an end-to-end system for automated RFP discovery, summarization, and bid management.
- Implemented scraping pipelines using Selenium and integrated LLMs for intelligent summarization.
- Designed scalable backend and responsive frontend architecture.

Smart Placement Prediction
- Built and compared ML models (Logistic Regression, Random Forest, XGBoost, Gradient Boosting) to predict student placements.
- Performed data cleaning, feature engineering, and EDA using Python.

- Logistic Regression gave the highest accuracy among all models.

Alzheimer's Disease Prediction
- A machine learning model to predict Alzheimer's Disease using clinical and demographic data.
- Performed data preprocessing, EDA, feature scaling, and trained models like Logistic Regression, KNN, SVM,RF.
- Evaluated models using accuracy, precision, recall, F1-score, and confusion matrix to identify the best-performing algorithm.

EDUCATION

Postgraduate Program in Data Science and Analytics 2024 - 2025
Imarticus Learning, Thane

B.E. in Electronics & Telecommunication Engineering 2021 - 2024
Don Bosco Institute of Technology
CGPA: 7.36

Diploma in Computer Engineering 2018 - 2021
M.H. Saboo Siddik Polytechnic
Percentage: 86.69%

CERTIFICATIONS

Poster Presentation – ICSTEMSD 2025
- Presented research on Speech Recognition using Neural Networks.

Accenture Data Analytics and Visualization Virtual Experience
- Performed data cleaning, analysis, and visualization for a simulated client.
